

An Initiative by Samarth Child and Women Welfare Society

# Amritvarshini – Cancer Preventive Initiative

# AMRITVARSHINI – CANCER PREVENTIVE INITIATIVE

Amritvarshini is a mission-driven cancer prevention campaign by Samarth Child and Women Welfare Society. This initiative is dedicated to protecting young girls and women from the risks of cervical and breast cancer through awareness, early detection, and preventive healthcare measures.

Through education, medical counseling, HPV vaccination drives, and community outreach, we aim to create a cancer-free future for women in India.

A MISSION TO SAFEGUARD YOUNG GIRLS & WOMEN FROM CERVICAL & BREAST CANCER

## **Key Focus Areas**

#### Cancer Awareness & Education

- Conducting school-based workshops to educate young girls about cervical and breast cancer, self-examinations, and lifestyle precautions.
- Creating multimedia campaigns to reach women across urban and rural areas.

#### Early Detection & Screening Camps

- Organizing free medical check-up camps in collaboration with hospitals and healthcare professionals.
- Promoting self-examination techniques for breast cancer awareness.

## **Key Focus Areas**

#### HPV Vaccination Drives

- Facilitating affordable HPV vaccinations to protect young girls against cervical cancer.
- Partnering with schools, community centers, and healthcare institutions for large-scale vaccination efforts.

#### Medical Counseling & Support

- Providing one-on-one medical consultations with expert doctors.
- Offering psychological counseling and guidance to young girls and women at risk.

# **Key Focus Areas**

# Community Engagement & Advocacy

- Training awareness ambassadors to spread cancer prevention knowledge.
- Working with government bodies, NGOs, and corporate partners to make screenings and vaccinations more accessible.

## Why This Initiative Matters?

- Cervical Cancer: Over 120,000 women in India are diagnosed annually, but vaccination and screenings can prevent it.
- Breast Cancer: The most common cancer among Indian women. Early detection increases survival rates by over 90%.
- ◆ Lack of Awareness & Access: Many women in India remain unaware of preventive measures and free screening opportunities.

With Amritvarshini, we aim to change this reality by ensuring every girl and woman gets the knowledge, medical support, and vaccination she needs.

## Our Approach: Step-by-Step Impact

#### F STEP 1: Education & Awareness

- School & community workshops
- Digital awareness campaigns
- Self-examination training

# **♥ STEP 2: Early Detection & Medical Support**
